PROFESSIONAL SUMMARY

Results-driven Web Developer and recent Information Technology graduate with proven experience engineering full-stack web and mobile applications. Specialized in building scalable, user-centric platforms using Python (Django, Flask), React Native, and JavaScript, alongside integrating hardware and AI solutions. Adept at managing the full software development lifecycle to deliver intuitive web tools that optimize business operations and enhance user experiences.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, Java, HTML, CSS
- **Web & Mobile Frameworks:** Django, Flask, FastAPI, React.js, React Native, Bootstrap CSS, Tkinter, Flet
- **Databases & Cloud:** PostgreSQL, MySQL, SQLite, Firebase, Supabase, PythonAnywhere, Vercel
- **Tools & API Integrations:** Git, Mapbox, OpenCV, Canva
- **Hardware & IoT:** Raspberry Pi, Arduino, ESP32, NodeMCU

EXPERIENCE

The Potter's House by Chinyu | Butuan City, Philippines
IT Intern | Web Developer

- Developed a comprehensive web-based inventory management system to track products, streamlining daily stock operations and significantly reducing manual bottlenecks.
- Implemented digital Purchase Order (PO) and Purchase Request (PR) workflows, greatly improving procurement efficiency and speed.
- Built dynamic web data visualization dashboards to show transaction trends and distribution, aiding management in critical business decision-making.
- Created robust activity logging features to monitor inventory movements and ensure operational accountability.
- Collaborated directly with staff to understand workflows and deliver a centralized web platform that minimizes manual errors.

PyBalanghay Organization | Butuan City, Philippines
Trainer

- Conducted hands-on technical workshops for college peers, breaking down complex programming concepts into practical, easy-to-understand lessons.
- Spearheaded community outreach programs, introducing local high school students to foundational coding skills through interactive training sessions.
- Mentored students during live coding activities, providing real-time troubleshooting and fostering a highly collaborative learning environment.

EGF Organization | Butuan City, Philippines
President

- Directed the campus chapter of the EGF-New Life a Roman Catholic community, aligning all student activities and outreach with the core vision of "Winning, Witnessing, and Working with Christ."
- Managed the organization's daily operations, overseeing schedules, communications, and student engagement while serving as the primary bridge to the main EGF-New Life Community in Butuan City.

WEB & TECHNICAL PROJECTS

SafeBite: AR-Powered Navigation & Dining App
Built with React Native, Python (FastAPI), Unity, Firebase, Mapbox

- Designed a mobile application and backend web administrative platform utilizing Mapbox to provide pedestrians and vehicle users with crime-avoidant routes in Butuan City.
- Integrated augmented reality (AR) navigation for real-time, turn-by-turn directions to ensure user safety.

The Potter's House by Chinyu: Inventory and Procurement System

STEPHEN CEASAR A. NAVARRA

+63 910 860 8409 | stephenavarra.work@gmail.com | Butuan, Philippines |
https://www.linkedin.com/in/stephen-ceasar-navarra/ | https://github.com/stphnvrra

Built with Python (Django), MySQL, HTML/CSS, Boostrap CSS, JavaScript (Chart.js)

- Engineered a comprehensive web-based administrative platform providing staff with robust tools to track stock levels and calculate complex product costs.
- Digitized the management of purchase requests and orders, integrating dynamic data visualization for real-time monitoring of transaction trends.

LoKal: An Offline Educational AI Learning Assistant
Built with Python (Django), JavaScript, HTML/CSS, SQLite, Ollama, Vosk, Raspberry Pi 4B

- Developed a production-ready offline web educational platform integrating local AI models to ensure accessible, internet-free learning for students.
- Implemented voice recognition for a conversational assistant and automated Wi-Fi hotspot deployment for zero-configuration device connections.

KickX: A Comprehensive E-commerce and Sneaker Retail Platform
Built with Python (Flask), SQLite, HTML/CSS, Bootstrap 5, JavaScript (PayPal SDK), Data Analysis (Pandas/NumPy)

- Designed a full-stack web-based e-commerce platform allowing users to browse product catalogs, manage shopping carts, and process secure payments.
- Developed a dynamic, data-driven recommendation engine using Pandas and NumPy to personalize product discovery and track trending items in real-time.

Garbage Bot Picker: Gesture-Controlled Robotic Vehicle
Built with Python (Flask, OpenCV), NodeMCU, MPU6050, Raspberry Pi (GPIO), ESP32-CAM, TCP/IP Sockets

- Programmed a gesture-controlled robotic vehicle featuring a mechanized arm and an intuitive control system translating hand orientation into movement.
- Implemented real-time video streaming via ESP32-CAM and OpenCV using TCP/IP Sockets

PHQuest: A Philippine Discovery Quiz Game
Built with React Native, Python (FastAPI), SQLite

- Created an interactive mobile application and backend server with dynamic game mechanics focusing on the Geography, History, and Culture of the Philippines.
- Engineered a real-time global leaderboard, life systems, and detailed user performance tracking.

VOLUNTEER WORK & ACHIEVEMENTS

- **Trainer**, Community Extension Service (Libertad & Taligaman National High Schools) | PyBalanghay Organization | Feb - Mar 2025
- **Trainer & Associate Trainer**, Basic Python & Web Development Workshops | PyBalanghay Organization | Nov 2024
- **Participant**, HACKFORGOV Capture-the-flag Competition | DICT Caraga | Aug 2024
- **Facilitator**, "Empowering Students Through Digital Knowledge" | ACLC Community Extension Service | May 2024
- **Participant**, Programming Contest & Delegate | PSITE ICT Student Congress | May 2024

WORKSHOPS AND SEMINARS

- **Productivity Tools Training and Workshop on Python Programming Language and Adobe** Photoshop | November 2022
- **Empowering Students through Digital Knowledge - ACLC Community Service** | May 2024

EDUCATION

ACLC College Of Butuan Butuan, Philippines
Bachelor of Science in Information Technology *2022 - 2026*
